

## ES Lesson 0-0002 Conduct Individual Refit

**Immediately following a mission, a ground team member should take the following steps to prepare for the next sortie or mission:**

### **REPLENISH**

Replace or replenish all items that may be missing, expired, consumed or irreparably damaged

### **REPAIR**

Make field repairs as necessary. Clean items that have been soiled and dry what has been wet.

### **REPACK**

Repack gear so that you are ready for the next sortie or mission.

### **REST**

After you have replenished, repaired, and repacked, get some well-deserved rest - you never know when the next sortie or mission will happen.
